Hi Tessa and Heather,

I need your help getting screenshots from the SSCS back office system to complete the DABS automation setup we discussed.

What I need:

Screenshots showing the exact reports and screens you use in SSCS to create the data exports that go into the monthly DABS Sales Report upload template.

Specifically looking for:

- The main reports screen/menu where you select sales reports
- Any sales report configuration screens (date ranges, filters, etc.)
- The actual reports you run that contain the data for DABS monthly reporting
- Any export or data extraction screens you use

Background:

This is for the automation project that will eliminate the manual DABS reporting work you've been tracking (the 16.5+ hours monthly). Once I can see exactly which reports you're using and how you access them, I can automate the entire export process.

Timeline:

I'm ready to build this as soon as I have the screenshots. The sooner we can get this automated, the sooner you can stop doing this manual work each month.

Can you get these screenshots from the back office system when you're there next? You can email them directly to me or upload to a shared folder.

Thank you,
Shawn

On the above screen, the beginning date and ending date would correlate with the month needed

Above is the report generated. This includes all the info needed by the DABC except (1) list price and (2) this report only includes items that were either bought or sold during the time range specified, so there are items in our inventory that potentially did not move during the time specified and therefore won't show up on this report
